### **Response to Amendment and Arguments**

1. Applicant's amendment filed April 17, 2006, has been entered and made of record.

2. Applicant's arguments with regard to claims 95-98 have been fully considered, but are not considered persuasive because of the following reasons:

Regarding the rejection of claim 95 under 35 U.S.C. 112, first paragraph, the Applicant cited (top of page 5 of Remarks) the support of the classifying step "on a pixel-by-pixel basis and is given an initial classification as either a background pixel or a foreground pixel" at specification, page 24, lines 1-3 and the prediction step "the pixel processing module uses a predictive technique associated prediction parameters to provide multiple predictions about the value of a pixel in a subsequent frame. Any pixel that deviates significantly from these predicted values is classified as a foreground pixel; other wise, the pixel is classified as a background pixel" at specification, page 24, lines 3-7. The Examiner respectfully disagrees. The classifying step and the prediction step that the Applicant discussed in the Remarks page 5 are not the predicting steps and the classifying step claimed in claim 95. Perhaps, the Applicant provides "ample" supported for limitations discussed at page 5 of the Remarks. However, the Applicant does not provide supported for limitations as claimed in claim 95.

Thus, the rejections of all of the claims are maintained.

## Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 95-98 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Regarding claim 95, the Applicant is advised to clearly point out the support for the limitations specifically the predicting steps and the classifying steps (page number and line number). Appropriate correction is required.

Claims not specifically addressed are rejected because they are dependent to the rejected claims.

#### Allowable Subject Matter

5. Claims 95-98 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action.

Application/Control Number: 09/400,346 Page 4

Art Unit: 2624

#### Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
